kmsauto net 2016 v1.5.4 portable kmsauto net 2016 v1.5.4 portable (Windows) - A utility for automatically setting up KMS (keyboard, mouse, touchpad) on machines that have it, with high success rate (when it works). Concretely, the software tries to auto-detect keyboard/mouse/touchpad settings, and apply them to your current mouse/keyboard/touchpad when you're in Windows. It requires your Windows username and password, a couple of extra settings (such as the position of your mouse), and a KMS-enabled keyboard/mouse/touchpad that you are currently using. This program has been optimized to work without internet connection.
